

VIVEK KUMAR RAI

Flutter & Android Developer

Chandigarh, India · +91 6201662075 · vivekkumar620166@gmail.com · [linkedin.com/in/vivek-kumar-405091215](https://www.linkedin.com/in/vivek-kumar-405091215)

PROFILE

Flutter & Android Developer with 2+ years of experience building and shipping production mobile applications using Dart, Flutter, Kotlin, and Java. Experienced in Clean Architecture, state management, REST APIs, GraphQL, payments, maps, CI/CD, testing, debugging, and app releases to Google Play and the App Store, with hands-on native Android development using Jetpack Compose, WorkManager, foreground services, platform channels, and performance optimization.

TECHNICAL SKILLS

Languages: Dart, Kotlin, Java

Mobile: Flutter, Android SDK, iOS SDK, CocoaPods, Material 3, Platform Channels, Isolates, Streams, Responsive & Adaptive UI

Architecture & State Management: Clean Architecture, BLoC, Cubit, GetX, Provider, Riverpod, MVVM, SOLID, Monorepos, White-label

Networking & APIs: REST, GraphQL (Shopify Storefront), Dio, WebSockets, Socket.IO

Data & Storage: Firebase (Auth, Firestore, FCM, Crashlytics), Hive, SQLite, flutter_secure_storage

Mobile Security: API Encryption, SSL Pinning, Root/Jailbreak, Developer Mode, Runtime Checks, Play Integrity, Keystore/Keychain

Payments, Maps & Location: Stripe, Razorpay, Apple Pay / Google Pay, GoKwik, Google Maps SDK, Geolocator, Geocoding

CI/CD & Tools: GitHub Actions, Fastlane, FVM, Git, Jira, Android Studio, Xcode, Figma

Testing & Debugging: Unit/Widget/Integration Testing, Mockito, Mocktail, DevTools

Native Android: Foreground Services, WorkManager, Broadcasts, Room, Telephony/CallLog, Compose & Navigation

WORK EXPERIENCE

Flutter & Android Developer | WebHoppers Infotech Pvt. Ltd

Aug 2024 – Present

Zirakpur, Punjab, India

- Build and maintain cross-platform apps using a feature-first Clean Architecture setup, reusing shared domain and core packages across projects
- Constructed Dio-based API clients with automatic JWT refresh, typed response parsing and retry/backoff for reliable requests on weak networks.
- Deployed Socket.IO and WebSocket integrations for real-time chat, lead alerts and live tracking, with reconnect handling across Wi-Fi and mobile-data switches.
- Orchestrated GitHub Actions, Fastlane and FVM pipelines so builds are tested and pushed to both stores automatically, with Slack notifications on every release.
- Presented native Android capabilities — background/foreground services, platform-channel bridges, performance and memory profiling with DevTools.
- Oversaw Google Play and App Store releases, including signing, review responses, and staged rollouts, and mentored junior developers on modular design and testing.

Flutter Developer Intern | Alphawizz Technologies Pvt. Ltd

Oct 2023 – Apr 2024

Indore, Madhya Pradesh, India

- Designed production UI screens with Provider and GetX from Figma designs, and implemented offline-first storage with Hive and SharedPreferences plus auto-sync on reconnect.
- Unified REST APIs, Firebase Authentication and Firebase Cloud Messaging (FCM), and fixed layout and performance issues reported during QA cycles.

PROJECTS

PharmaHoppers — B2B lead marketplace connecting pharma manufacturers and franchise buyers (*IndiaMART-style, pharma-specific*)

Tech: Flutter, BLoC, Dio, Socket.IO, Hive, FL Chart [Play Store](#) · [App Store](#)

- Established stale-while-revalidate caching with Hive for instant list rendering and background server refresh.
- Optimized infinite-scroll pagination and debounced search across lead, catalog, and product screens.
- Created a server-driven inquiry form engine and FL Chart analytics, plus Socket.IO for real-time lead alerts and chat.

WH Pharma – PCD Franchisee — White-label distribution app for pharma companies

Tech: Flutter, GetX, Firebase, WorkManager, Geolocator, Fastlane [Play Store](#) · [App Store](#)

- Structured a single codebase with per-client flavors, so new branded builds ship from configuration instead of separate projects.
- Delivered order, catalog, MR, and retailer modules with WorkManager background sync.
- Provisioned offline catalogs and visual aids, PTR/PTS pricing, and adaptive tablet UI.

Local Ride (Canada) — Community-focused ride-hailing platform — separate rider and driver apps in one monorepo

Tech: *Flutter, GetX, Firebase, Stripe, Google Maps SDK* [Play Store](#) · [App Store](#)

- Directed live ride tracking on Google Maps with animated, bearing-based car markers and auto-framing camera bounds.
- Configured Stripe PaymentSheet with Apple Pay and Google Pay, including pre-authorization holds, tip selection, and coupon-based fare discounts.
- Authored a shared component library of 51 reusable UI widgets across rider and driver apps.
- Added runtime security checks for root/jailbreak status, developer mode, mock locations, and app integrity.

GloPetra — D2C skincare commerce app with AI-based skin assessment

Tech: *Flutter, GetX, Shopify Storefront GraphQL, Dio, Hive* [Play Store](#)

- Launched Shopify Storefront GraphQL catalog and multi-variant cart flows, integrating GoKwik one-tap OTP checkout and Hive caching.
- Applied AI skin assessment from selfies to generate personalized skincare routines, with direct cart recommendations and Nector loyalty integration.

Pharma Lead Verification (Telecaller) — Internal Android tool for the pharma sales team

Tech: *Kotlin, Jetpack Compose, MVVM, WorkManager, Room, TelephonyManager, MediaStore*

- Crafted Jetpack Compose (Material 3) UI across 12+ screens, including a custom draggable floating audio player.
- Engineered MediaStore and Content URI scanning to discover call recordings across OEM-specific storage paths, with Android 13/14 runtime permissions.
- Implemented WorkManager and foreground services to reliably upload call recordings to AWS S3 after app termination or device reboots, with TelephonyManager/CallLog for call tracking.

EDUCATION

B.Tech, Electronics and Communication Engineering

2020 – 2024

Sagar Institute of Research & Technology, Bhopal, Madhya Pradesh · CGPA 7.8
